THE PROGRAM

PHASE 1: THEORETICAL FOUNDATION

You will engage with essential knowledge and core subjects from the Quant and Data Insights section, emphasizing the comprehension of key concepts, formulas, and a systematic approach.

QUANTITATIVE

- Arithmetic: divisibility, fractions, ratios, percentages
- Algebra: linear and quadratic equations, systems of equations
- Number Properties: Integers, Multiples, and Divisibility
- Fundamental statistics: average, median, range
- Emphasize the application of formulas and the comprehension of theoretical concepts.

DATA ANALYTICS

- Introduction to the three typologies: Table, Graphic, and Two-Part Analysis.
- Methodology for Analyzing Graphs and Tables
- Development of the structured analysis methodology

THE PROGRAM

PHASE 2: CLASSIFICATION

You will analyze all categories of test exercises, learning to identify them and apply specific techniques. The focus of the work is on strategy and time management.

QUANTITATIVE

- Word Problems: rate and work, distance/time, overlapping sets, and others
- Combinatorial Analysis and Probability Theory
- Questions that require multiple logical steps
- Drills categorized by type and timed simulations

DATA ANALYTICS

- Integrated inquiries and intricate scenarios
- Comparative assessment, dual conditions, incomplete data
- Data Sufficiency: Logical Framework and Response Techniques
- Efficient utilization of the calculator and practical timing

CALENDAR 2026-2027

TAH LOOP: **Join at your convenience and depart equipped.** The program consists of five thematic modules (each lasting two weeks), cycling every ten weeks. You may begin at any time.

ONLINE COURSE – BATCH 1

Wednesday 6:30–8:30 PM and Saturday 9:00 AM–12:00 PM

Microsoft Teams and access to the student area
